To whom it may concern,

I have known Saša Regoršek since the second year of her architectural studies at the Faculty of Architecture, University of Ljubljana. I was her mentor from 2010 to 2013, during her studies in the course Design studio II, III and IV.

Saša was one of the most noticeable students. Her work exhibits precision, creativity and good judgement, and she takes an in-depth and complex approach to any architectural task, which results in excellence and freshness of her solutions. In addition to following the regular study programme, she has participated in several workshops and architectural competitions with noticeable success. Her projects were published in catalogues and represented to public on several exhibitions.

It is for these reasons that I offer high recommendations for Saša Regoršek without reservation.

Please do not hesitate to contact me for any further details or discussion.

Yours sincerely
